

P78 QUICK APPLY

The p78 Quick Apply App enables job seekers - who increasingly want to apply mobile and quickly - to submit their candidate data in seconds without having to register. The resume can be uploaded and processed directly from the smartphone or directly from the cloud, so that even the input fields of the application form are automatically pre-filled.

FEATURES

The range of functionalities includes the following aspects of an innovative recruiting process and thus differs from the SAP standard:

- Applications without complicated registration, without entering a password or completing time-consuming online forms
- Simple and fast upload of various attachments (multiple attachments: CV, certificates, cover letter)
- CV-Parsing: relevant information from the individual CV is extracted by semantic technologies and automatically transferred to the form
- Comprehensive design options for adaptation to the customer's CI
- Support of job specific questionnaires based on the job requisition (Screening Questions)
- Attractive and responsive UI of the p78 Quick Apply App
- Possible use of p78 Quick Apply along with the SAP standard "Apply" (can be individually integrated e.g. for business units)
- Always up to date - Native Cloud Delivery Model: automatic updates included, no additional costs

The following functions can be added individually:

- Candidates can apply with their files stored in the cloud (Dropbox, Google Drive) in addition to their locally saved CV

Do you have additional requirements or are you looking for specific functionalities? Please contact us. We will find a solution. Find out more at: [Quick Apply Landingpage](#)

P78
QUICK APPLY
SF RECRUITING
